Setting up a Lex chatbot

Adding language and setting up Confidence score

Add language to bot [Info](#)

▼ Language: English (IN)

Select language

English (IN)

Voice interaction

The text-to-speech voice that your bot uses to interact with users.

Kajal

Voice sample

Hello, my name is Kajal. Let me know how I can assist you.

Play

Intent classification confidence score threshold

0.40

Min: 0.00, max: 1.00.

In terms of the intent classification confidence score, I kept the default value of 0.40. This means that the bot should be atleast 40% confident on if he understands the user

Setting up of intents

Intents are what the user is trying to achieve in their conversation with the chatbot.

Fallback Intent
